

Scenic River Sundays

Presented by Clermont County Park District and Little Miami Conservancy

June 11th (10 am – 11 am) Mammal Madness

Coyotes, foxes and deer, oh my! Animals have many adaptations that help them survive in their habitat. Can you think of some adaptations that help humans survive? Learn how to identify some of our favorite local animals by their adaptations, and by searching for animal “clues” during our outdoor hike. You can also make your very own “tracks” to take home and join in on a fun game!

July 9th (9 am – 11:30 am) Canoeing on the Little Miami River **CANCELLED**

Do you know what critters are living in your local streams? Wander down the Little Miami River with us, as we canoe and learn what lives in the water and how our actions can influence the types of animals we see in our streams and rivers!

August 13th (10 am – 11 am) Predators and Prey

Imagine you are a small animal in a large forest with bigger animals wandering about! What tools or abilities do you have to avoid becoming food for another animal? Join us for an hour of fun as we learn how some animals interact and survive in the web of life! Through games and activities, kids will learn about the unique animal adaptations that help animals find their food or avoid becoming someone else’s food!

September 10th (9 am – 11:30 am) Canoeing on the Little Miami River

****Cook out after****

Join us for some fun on the river as we learn about river ecosystems and the important role that water plays in shaping our streams! We will canoe down the Little Miami River and finish up our program with a complimentary cookout.

This nature series will be held at Little Miami Conservancy Visitor Center,
located at 209 Railroad Avenue, Loveland, Ohio 45150—on the bike trail in downtown Loveland.
