

LMC Wildlife Wednesday Programs 2018

Wednesday, April 18th: Helpful Habits

It's easy being green! Naturalists from the Clermont County Park District will demonstrate some simple ways to reduce your carbon footprint. Children and adults of all ages will learn about the impacts that affect our planet and the changes in our daily habits that will make all the difference!

Wednesday, May 16th: Nature Babies

Have you ever wondered what a baby opossum is called? Or how wildlife young survive the big, brave world? Find all the answers during our Nature Babies program and meet our live education ambassadors. We'll have some hands-on learning activities and a make and take craft for your little ones!

Wednesday, June 20th: Fossil Frenzy

Did you know that Cincinnati is famous for its fossils? Cincinnati's fossils are so Prehistoric, the animals that were found in this area are older than the dinosaurs! Learn the names of our Ordovician Fossils and search for them in O'Bannon Creek. You will even get to take some home! Join in on a fun game after the fossil hunt in the creek!

Wednesday, July 18th: Drip, Drip, Drop: Water Conservation

Become a junior scientist while investigating our important natural resource - water. Junior scientists will learn how the water cycle works through an interactive game. Help Clermont County Park Naturalists test water quality by using different methods that real-life scientists use!

Wednesday, August 15th: Fur, Feathers & Scales!

Oh, my! Compare and contrast animals' adaptations and habitats. During our live animal talk, children and adults will learn what it takes for our local wildlife to survive and thrive. Join in on a fun game and create your own animal to take home!

Wednesday, September 13th: Wild Edibles

In 1806, Lewis and Clark relied on the Pawpaw tree and its fruit to escape starvation during their expedition. Discover what other plants and trees were used as food and medicine by the Native Americans and some interesting beliefs and uses of plants the pioneers used to "cure" ailments during our nature hike. Come with an appetite so you can sample nature's gourmet offerings.

Wednesday, October 17th: TREEmendous Trees

Days are getting shorter, nights are getting longer, and weather is getting cooler. Learn how our trees adapt to these changes and support our local wildlife. Identify trees as you take a colorful, guided hike with your favorite Naturalist. Say goodbye to our local wildlife before they scurry off for the winter. Join in on a fun activity and make a beautiful, fall craft!
